

PRESS STATEMENT

Date of release: 13 September 2019
Approved by: Shahedal Bari , Medical Director,
Issued by: Karen Gardner: karen.gardner@mbht.nhs.uk
Reference: 09/19/184

Dr Shahedal Bari, Medical Director, UHMBT “We want all our patients to have as good an experience as possible in our care. That clearly did not happen in this case and we would like to apologise again to the patient for his experience, however a vasectomy (male sterilization) isn’t always 100% effective the first time.

“We can’t give out any details about the patient, but he has previously been in touch with our Patient Advice Service (PALS), and we will contact him again to discuss his concerns.

“If anyone is concerned about their care or treatment, we would encourage them in the first instance to contact the care provider, in our case PALS on 01539 715577, or PALS@mbht.nhs.uk or their GP.”
