BEHAVIOURAL STANDARDS FRAMEWORK

To help create a great place to work and a great place to be cared for, it is essential that our Trust policies, procedures and processes support our values and behaviours. This document, when used effectively, can help promote a workplace culture that values the contribution of everyone, shows support for staff as well as patients, recognises and celebrates the diversity of our staff, shows respect for everyone and ensures all our actions contribute to safe care and a safe working environment - all of which are principles of our Behavioural Standards Framework.

Behavioural Standards Framework – Expectations ‘at a glance’

Introduce yourself with #hello my name is... 	Value the contribution of everyone	Share learning with others
Be friendly and welcoming	Team working across all areas	Recognise diversity and celebrate this
Respect shown to everyone	Seek out and act on feedback	Ensure all our actions contribute to safe care and a safe working environment
Put patients at the centre of all we do	Be open and honest	For those who supervise / manage teams: ensure consistency and fairness in your approach
Show support to both staff and patients	Communicate effectively: listen to others and seek clarity when needed	Be proud of the role you do and how this contributes to patient care

1. SUMMARY

Mortality reviews are an established part of provision of high quality clinical care. The Trust is committed to continuous learning and service improvement and acknowledges that systematic mortality review has a crucial part in delivering the clinical quality agenda and providing assurance of quality improvement. This policy focuses on ensuring that the mechanisms for mortality review are effective in protecting patients from harm.

2. PURPOSE

This policy has been written to fulfil the requirements of local and national guidance and the recommendations from 3 key documents are incorporated into this policy which will identify how the Trust will internally undertake mortality reviews.

- Systematic failings at Mid-Staffordshire NHS Trust were identified by examining the implications of mortality rates. Analysis of all deaths within the hospital supports the Trusts response to the recommendations of the Francis 2 Report (HSMO, 2013).
- A recent Mersey Internal Audit Agency review of mortality processes at the Trust made a number of recommendations to improve current mortality review processes.
- National Guidance on Learning from Deaths, was published by the National Quality Board in March 2017, this key document outlines the principles of mortality reviewing expected of Trusts

It is principally the responsibility of the department and the consultant medical staff to conduct mortality reviews in order to identify any aspects of clinical care that may have had an impact on the final outcome for patients who have died within the Trust. Trust to ensure that there is a system and governance in place to ensure that this happens and the learnt lessons are shared amongst staff. The Academy of Royal Colleges produced guidance on how mortality reviews should be undertaken to improve quality of care, with a 3 year phased programme of training to introduce standardised methodology using Structured Judgement Reviews.

2.1 Main Aims

The aim of this policy is to set out clear roles and responsibilities to ensure that the Trust meets its obligations to undertake mortality reviews of a consistent quality. These include:

- Clinicians (including doctors, nurses, allied health professionals etc.) systematically use mortality reviews to provide assurance that the care provision within their service is of high quality and is safe; utilising lessons learned from these reviews to improve patient outcomes, where possible.
- Results of the process of reviewing mortality will collectively provide assurance that the Trust is doing all it can to learn from episodes of care where harm has occurred.
- Identify where clinical pathways, which are across the whole health economy, can affect patient care provision and ensure these are reviewed accordingly.
- Support the Trust data collection by ensuring clinical documentation surrounding diagnosis and co-morbidities are consistent and accurate.
- Use of details from the review of Cardiac Arrest calls that have resulted in patient death, to enhance the learning across all teams in relation to the causes of mortality.
- To ensure all areas where care can be improved or risk of harm (near-misses and misses) are identified and learnt from.

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073
Version No: 1.1	Next Review Date: 01/09/2019	Title: Mortality Review Process
<i>Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version</i>		

2.2 Secondary Aims

The mortality review process also aims to

- Review the quality of end of life care by ensuring that patients' wishes have been identified and met
- Improve the experience of patients' families and carers through better opportunities for involvement in investigations and reviews
- Identify and minimise avoidable admissions or late presentation

3. SCOPE

Mortality reviews are systematic retrospective case note and electronic patient record reviews designed to enable clinicians and managers at any level in the Trust to understand the underlying conditions that lead or contribute to the death of patients and to identify any learning.

This policy relates to all adult deaths, from 18th birthday onwards for which the Trust is responsible (including the Emergency Departments) either by issuing a death certificate or referral to the relevant Coroner.

All child deaths (up to 18th birthday) are reviewed within the processes of the Local Safeguarding Children's Boards (LSCB) through the Child Death Overview Panel (CDOP). However, it would be expected that, where necessary this investigation will be completed as a joint multidisciplinary approach coordinated by the Paediatric department involving any other departments in order to review deaths in older children who may be in the transition between adult and paediatric services (up to their 18th birthday).

This policy relates to the following staff groups who may be involved in the mortality review process:

- Consultants
- Nursing Staff
- Clinical Coding Staff
- Clinical Audit & Effectiveness Staff
- Quality Improvement Staff
- Governance Staff

The policy is applicable to:

- All in-hospital deaths in all specialties

The policy is not applicable to maternity deaths; these are covered by the Trust document "Mortality Review Process WACS" Obs/Gynae/Proc/001 (see Section 6 for link).

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073

<i>Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version</i>		

3.1 Roles and Responsibilities

Chief Executive

- Has overall responsibility for this policy and compliance

Non-Executive Director

- The Chairperson of the Quality Committee is the Non-Executive Director who will take oversight of progress for the learning from deaths.

Medical Director

- The medical Director is an existing board member acting as the patient safety director to take responsibility for the learning from deaths agenda

Medical Director / Executive Chief Nurse/ Director of Governance

- Responsibility for implementation of the mortality review process
- Responsibility for Mortality Risk on Corporate Risk Register
- Respond to external enquiries about mortality
- Report outcomes and findings from mortality reviews, including LeDeR reviews, to the Trust Board
- Ensure that patient safety recommendations supporting the findings of the reviews are implemented and improvements monitored.

Deputy Medical Directors

- Oversight of the mortality review processes
- Ensuring divisional support for site based mortality review lead clinicians
- Ensuring all deaths are reviewed in all specialties, regardless of site
- Review data provided in relation to Hospital Standardised Mortality Ratio (HSMR) and Summary Hospital-level Mortality indicator (SHMI), and ensure that the Trust is aware at an early stage of any potential areas where outlier alerts may be raised.
- Ensuring that all pertinent cases and findings from mortality case reviews are presented by the appropriate clinical leads at specialty Mortality & Morbidity (M&M) meetings or at clinical audit meetings.
- Triangulating data with Governance and coding team and capture in trust governance system
- Ensuring that outcomes and learning from M&M meetings and clinical audit meetings are recorded and action plans for improvement are developed, where required
- Ensuring that findings are evaluated and reported to specialty and divisional governance meetings to promote learning
- Overseeing progress on the implementation and closure of action plans.
- Where necessary link with the Trusts Coroners liaison officer to identify any requirements from the Coroners officers.
- Develop a site based multi-specialty quarterly report covering a summary of the analysis, lessons learned, good practice points and actions taken; this report will be presented at the Quality Committee.
- Develop reports for Trust Board as required. These reports will also be shared at Clinical Directors group.

Site-Based Mortality Review Lead Clinicians

- The site based mortality review lead clinician arranges a multidisciplinary team, to complete weekly mortality case reviews for all adult deaths and discussion at M&M

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073
Version No: 1.1	Next Review Date: 01/09/2019	Title: Mortality Review Process
Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version		

meetings.

- Carries out case note reviews as per national and trust agreed standard
- Ensuring data collection, input in system and link to Ulysses system
- Engages with clinical coding when coding issues are identified
- Ensures that patients' families and carers are given an opportunity to be engaged with the review process, including providing feedback on the outcomes of the review as appropriate.
- Ensures all deaths are reviewed using a set proforma as recommended by the National Quality Board (2017) including HOGAN score of 1-5 and an NCEPOD score of 1-5 for each case review – see appendix 1
- Ensure lessons learned are disseminated in the divisional meetings order to obtain the maximum benefit from the reviews.
- Support the development of site based reports showing analysis of the findings from all reviews in order to ensure there is appropriate sharing of learning across the Trust, both good practices as well as identified areas for improvement.
- Liaise with the clinical audit team regarding cases which require discussion at M&M or clinical audit meetings
- Liaise with Divisional Governance Leads in relation to any cases where a full incident investigation is required.
- Liaise with Paediatric department to ensure all paediatric / neonatal deaths are included within the analysis.
- Liaise with Womens and Children's Division (WACS) to ensure all maternal deaths are included in the report
- Work with the site based Deputy Medical Director to develop a site based multi-specialty quarterly report covering a summary of the analysis, lessons learned, good practice points and actions taken; this report will be presented at the Quality Committee.
- Work with the site based Deputy Medical Director to manage the Mortality Risk on the Corporate Risk Register and also develop the annual report for presentation at the Trust Board meeting as a site based multispecialty report

Clinical Directors and Divisional General Managers

- Agree the process for senior attendance at the multidisciplinary, site based mortality review meetings.
- Ensure clinicians are allocated to attend the site based mortality review sessions and job planning is reviewed to ensure this activity is prioritised.
- Ensure that there is learning undertaken from these reviews within the division and where necessary actions are initiated and completed for cases discussed at the M&M or clinical audit meetings.
- WACS Clinical Director to ensure that all maternal deaths are reviewed and reported to the site based Deputy Medical Director for inclusion in the quarterly and annual report
- Paediatrics to ensure that all child deaths are reviewed and reports are completed within the timescale set within the LSCB guidelines for CDOP; provide summary details of all child deaths in the Trust to site based Deputy Medical Director.

Senior Nursing Staff

- Will encourage and lead multi-professional involvement in both conduct of and resulting actions from mortality reviews to promote maximum learning from issues identified.
- Provide professional nursing input / advice at mortality review meetings in conjunction with the medical staff reviewing the case.
- The Clinical Nurse Specialist for Learning Disabilities (trained in LeDeR methodology) is

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073
Version No: 1.1	Next Review Date: 01/09/2019	Title: Mortality Review Process
<i>Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version</i>		

part of a team of reviewers of deaths of Learning Disability patients for the North West Region. When the LeDeR reviewers cases are identified for full investigation, any lessons learnt will be communicated to the Medical Director.

Bereavement Administration Team

- Compile and update the database of Trust deaths for the Deputy Medical Director, mortality review groups and clinical coding.
- Requesting the patient notes and supply the relevant patient details, including incident and post mortem information, to the site based mortality lead clinicians in preparation for individual case reviews
- Informs Clinical Nurse Specialist (CNS) Learning Disabilities of deaths in those with learning disabilities.
- Informs the lead nurse for safeguarding of any deaths in those with a Deprivation of Liberty in place or who are detained under the Mental Health Act

Clinical Coding

- Participating in mortality peer reviews where coding issues have been identified
- Working with divisions if capture of coding needs improving

Clinical Audit Team

- Identify appropriate cases to be reviewed at clinical audit meetings
- To liaise with bereavement office for release of case notes for clinical audit meetings and subsequent return of said notes back to bereavement office

4. PROCEDURE

The Bereavement Administration Team ensures the relevant patient notes and ensures that the appropriate details including incidents and post mortem information are available to the case note reviewers each week. The Clinical Nurse Specialist for Learning Disabilities is informed of any patient with a learning disability who dies; the CNS instigates the LeDeR review process on behalf of the Trust.

Arranged by the site based mortality review lead clinician, an appropriate multi-disciplinary group should carry out the case reviews alongside the site based mortality lead

Each adult death, including learning disability and mental health cases, will have a case note review and this should be recorded in the Ulysses Bereavement module.

The case note review will establish if there were issues with the organisation of care or delivery of care which could be improved, generating a HOGAN score and an NCEPOD score for each case note review (Appendix 1).

Assessment of clinical coding should be part of the case note review but the primary focus should be to provide assurance on the quality of care; clinical coding may take place following the case note review

Case reviews carried out for maternity cases or for children and young people will be added to the Ulysses Bereavement Module by the divisional team. Separate mortality review processes are referred to in section 6.

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073
Version No: 1.1	Next Review Date: 01/09/2019	Title: Mortality Review Process
<i>Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version</i>		

4.1 Further Investigation

Cases which, when reviewed, generate a HOGAN score of 1 or NCEPOD score of 1 are expected deaths or have no indication of problems with care and are deemed to be unavoidable deaths; no further actions are required

Cases which, when reviewed, generate either a HOGAN score of 2 or NCEPOD score of 2 (or above) require the site based mortality review lead clinician to take further action:

- Where concerns have been identified but no incident has previously been reported, an incident report with brief details should be raised (by the site based mortality review lead clinician to trigger further investigation by the specialty team; the site based Deputy Medical Director should be informed.
- If there are concerns about the standard of care then the case should be reviewed at M&M meetings and clinical audit meetings. The overall aim is to learn lessons from clinical outcomes and drive improvements in service delivery. The M&M meeting and clinical audit meeting have a central function in supporting services to achieve and maintain high standards of care.
- Discussions, outcomes and learning from the M&M meetings and clinical audit meetings, including conclusions about outstanding care and sub-optimal care, should be formally recorded and reported back to the site based Deputy Medical Director
- Cases should also be discussed at divisional governance meetings with agreed actions being documented for wider learning

Cases which concern patients with learning disabilities will be the subject of additional rigour. The bereavement team will inform the Trust CNS for learning disabilities about the case, and the CNS will then arrange an external LeDeR review which is in addition to the Trust mortality review.

Cases which concern patient detained under the Mental Health Act or who have a DOLS in place will have a Trust mortality review. Additionally, for those who die whilst detained under the Mental Health Act, the safeguarding team will make a mandatory notification to the CQC, which activates robust review by NHS England. The safeguarding team also submits a clinical incident and will notify the Head of Patient Safety in order for the appropriate investigation process to commence.

The records generated from mortality case reviews, discussions at M&M meetings and clinical audit discussions should be used to inform any subsequent investigations, for example complaint or legal claim.

4.2 Outcomes

Outcomes from any investigation that follows the mortality case review (carried out as a result of identifying that there were issues with the organisation of care or where delivery of care could be improved) should be fed back to the patient's family and / or carers as per duty of Candour.

4.3 Reports

A monthly report produced by the Mortality leads will be sent to the Deputy Medical Director and the Divisional triumvirates and their divisional governance business partner for inclusion

University Hospitals of Morecambe Bay NHS Foundation Trust		ID No. Corp/Proc/073
Version No: 1.1	Next Review Date: 01/09/2019	Title: Mortality Review Process
<i>Do you have the up to date version? See the Trust Procedural Document Library (TPDL) for the latest version</i>		

in the monthly governance meeting to discuss lessons learnt. A trust wide quarterly report will be provided to the Quality Committee. This report will include data relating to the total numbers deaths in the Trust and information relating to the number of case reviews undertaken and information relating to the number of cases where deaths were more likely than not to have been as a result of problems in care, along with progress on actions taken.

An overall annual report may be provided to the Trust Board from the Deputy Medical Director. The annual report will be a single Trust wide and multispecialty report.

Appendix 1: Hogan and NCEPOD Scoring

Hogan Score - Is there any evidence for preventability of this death?

Score	Definition
1	Definitely not preventable
2	Slight evidence for preventability
3	Possibly preventable but not very likely, less than 50-50 but close call
4	Probably preventable, more than 50-50 but close call
5	Strong evidence for preventability
6	Definitely preventable

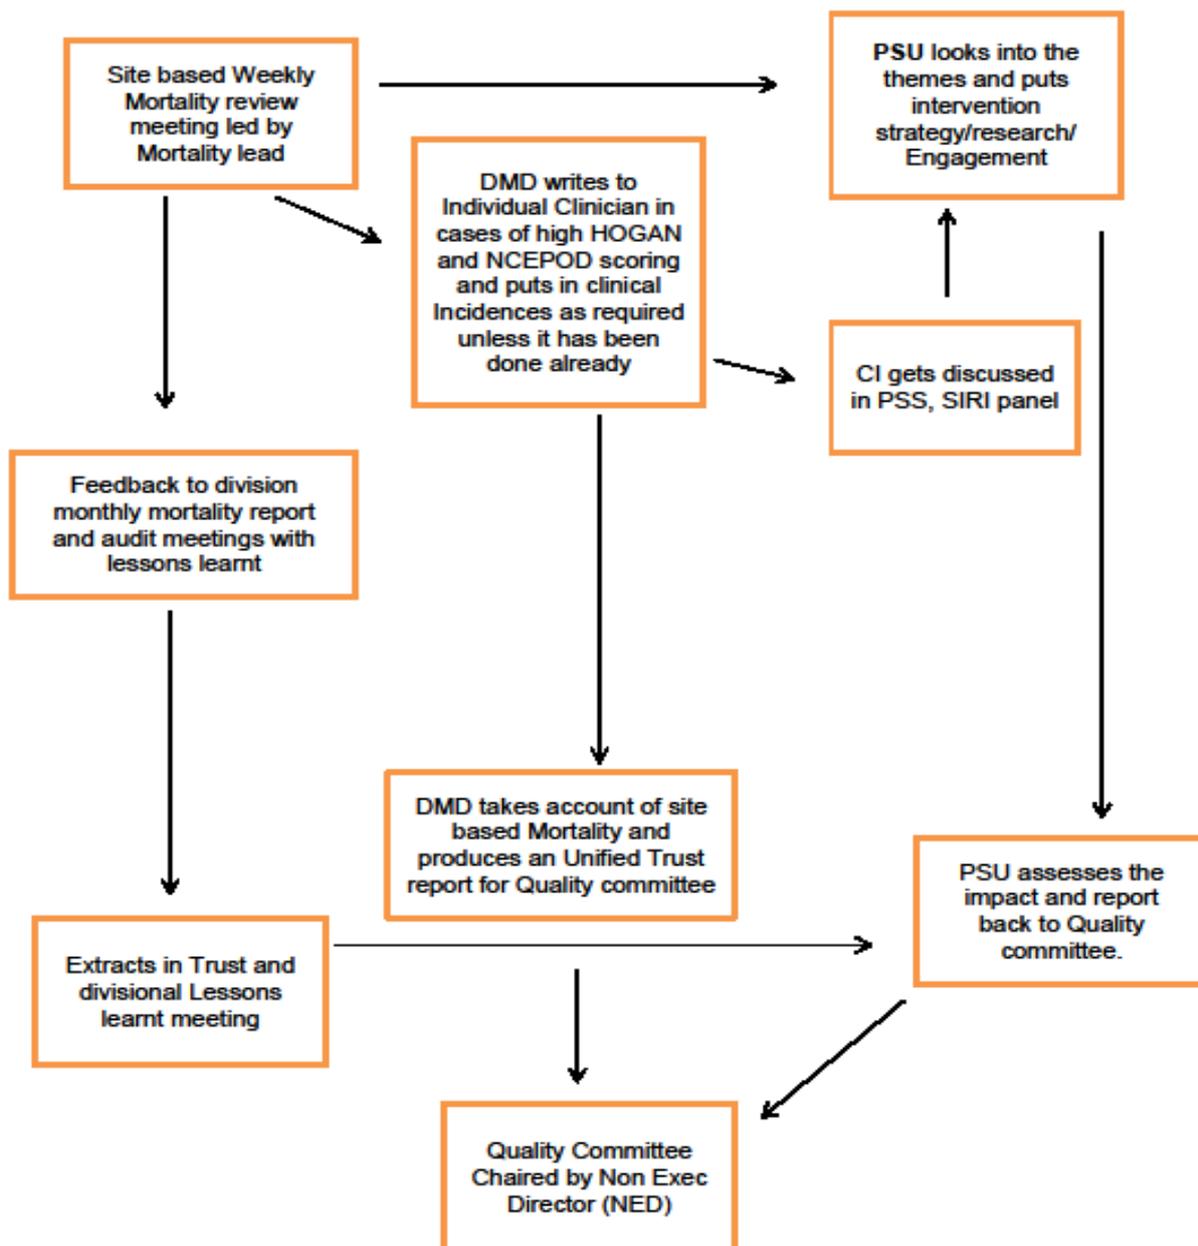

NCEPOD grade – areas for improvement

Score	Definition
1	Good Practice
2	Room for improvement in clinical care
3	Room for improvement in organisational care
4	Room for improvement in clinical and organisational care
5	Less than satisfactory aspects of clinical or organisational care - must be reported as a Clinical Incident via the Safeguard system
